☰ Qualification description

Become a web wizard. The Short Learning Programme in Web Design prepares you for work in the internet environment. It is a challenging and comprehensive career-orientated programme that prepares you for the world of work. It is also a very good stepping-stone to further studies in any of our Higher Certificates in Information Systems (IS).

This Short Learning Programme provides you with a fair grounding of theoretical foundation of, and practical experience in creating web pages, web design, web style coding, using content management systems as well as database development. Some of the core subject areas are Web Design, Content Management Systems, MySQL Development and Creating Web Pages. You also cover two broad topics that will be useful in any computer and business environment, namely Computer Literacy and Personal Skills Development.

The success of our Short Learning Programmes is due to our unique Mastery Learning Methodology (MLM). This modular self-directed learning approach gives you the flexibility to start and progress through the programme at a pace that best suits you. This learning methodology, together with our cutting-edge facilities such as computer labs, IS open learning areas and smart pods, will prepare you for the real IT work environment of the future.

What's more, you will start developing essential skills for the world of work, especially for the IT industry, such as analysing and solving real problems, applying logic, being innovative and self-disciplined, collaborating in team situations and communicating effectively.
